

RELEASE NOTE

PHASEONE

July 2010

Firmware 5.1.2 for Phase One P 45+, P 30+, P 25+, P 21+, P 20+ and ACHROMATIC+ digital backs.

This new firmware version is highly recommended and has the following new improvements and features:

1. Improved digital back auto calibration – gives a better image quality under some extreme conditions of use.
2. Support for larger capacity CF cards (e.g. Sandisk Extreme 32/64 GB (60/90MB) and Lexar 300X 16GB)

Firmware updater 2.3.1 is required to download this update, and is available from www.phaseone.com/download

For updating procedure please refer to the Firmware Updater ReadMe
